

GC SMART PART 1: METHOD DEVELOPMENT

DEVELOP YOUR OWN GC METHOD

Suitable for:

Professionals with experience in gas chromatography who want to further develop this knowledge.

Course topics

- Impact and optimization of column parameters to improve the separation and analysis.
- Impact and optimization of GC related parameters including carrier gas type, carrier gas flow and temperature to improve separation and analysis time.
- Structure and approach to method development
- Optimizing various injection techniques for liquids, including split, splitless and PTV
- Optimizing various injection techniques for volatile substances, including static and dynamic headspace.
- Column technology and column selection
- 2 practical sessions

2-DAY COURSE

Type of Course	Brand Independent
Practical	2 half days
Dates	27-28 februari 2024 15-16 oktober 2024
Price	€ 1825,-
