

THERMAL DESORPTION

OPTIMIZATION OF ANALYSIS PARAMETERS

Suitable for:

Anyone who works with GC in combination with TD analysis and want to gain more insights and efficiency.

Topics

- Principles of thermal desorption
- Hardware construction of the TD system
- Optimization of various analysis parameters
- Problem recognition and problem solving
- The use of various adsorption materials
- Hands-on Session

2-DAY TRAINING

Type of Course	Brand Independent
Practical	1 session
Dates	3-4 october 2024
Price	€ 1825,-
