

CHROMELEON FOR GC

Chromeleon offers a flexible and scalable Chromatography data system, for recording data and controlling more than 500 chromatography instruments. This includes third party instruments, Thermo Scientific single, triple quad and high resolution mass spectrometers, all controllable from the same workplace.

This course is designed to support you, for both new and existing users. Discover how this course can significantly help with the smooth processing of measurement data, so that sample-to-sample processing takes less time. This includes streamlined review of chromatography data, custom Chromeleon Studio viewing, and clear reports and templates tailored to different workflows.

Explore the specific design features of Chromeleon, focused on gas chromatography, and expand your knowledge of this comprehensive software solution.

Course Topics

- Construction and structure of Chromeleon
- Instrument control and operation
- Setting up measurements and applying analysis methods
- Integration and calibration
- Use and modification of reports
- Guided, independent software assignments

27 - 28 Jan
11 - 12 Mar
6 - 7 May
17 - 18 Jun
16 - 17 Sep
4 - 5 Nov

2 day course
